Scheme Riskometer

Nippon India Nifty Auto Index Fund

Investors understand that their principal will be at Very High risk

Benchmark Riskometer

Nifty Auto TRI

Benchmark riskometer is at Very High Risk

The product labelling assigned during the NFO is based on internal assessment of the scheme characteristics or model portfolio and the same may vary post-NFO when the actual investments are made.

*As per the Nifty Auto Index Methodology | *SIP stands for Systematic Investment plan, wherein you can regularly invest a fixed amount at periodical intervals and aim for benefits over a period of time through the power of compounding | Investors can also invest via SIP | **Low cost in terms of total expense ratio | The mentioned stocks are as on October 31, 2024 and may or may not form a part of the scheme in the future | Top Gears refers to Top 15 companies as per the Nifty Auto Index Methodology.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & stock selection is clearly defined, holding stocks as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** – Buying a single unit offers diversification benefit in the entire index companies.
- ▶ **Low Cost** – Generally less expensive than investing in multiple individual securities/active equity fund. (Low cost with respect to Total Expense Ratio)

Strategies used through Index based Equity Index Funds

- ▶ **Liquidity Management** – Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** – Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Cash Equitization** – Index funds assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.
- ▶ **Portfolio Transitions** – Since index funds are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty Auto Index Fund

Investment Objective : Nippon India Nifty Auto Index Fund

The investment objective of the scheme is to provide investment returns that commensurate to the total returns of the securities as represented by the Nifty Auto Index before expenses, subject to tracking errors. However, there is no assurance that the investment objective of the Scheme will be achieved.

- **Reduced Risk:** Elimination of non-systematic risks like stock picking and portfolio manager selection
- **Convenience:** Will also allow non-demat account holders to seek exposure to Automobile sector
- **SIP Investments:** Investors can avail the benefit of Systematic Investment Plan (SIP)
- **Low Cost:** Exposure to Automobile sector via low cost[^] index fund

[^]Low cost in terms of total expense ratio.

About Nifty Auto Index Fund

Overview

The Nifty Auto Index is designed to reflect the behaviour and performance of the Automobiles segment of the financial market. The Nifty Auto Index comprises 15 tradable, exchange listed companies. The index represents auto related sectors like Automobiles 4 wheelers, Automobiles 2 & 3 wheelers, Auto Ancillaries and Tyres.

Index Methodology:

Eligibility Criteria for Selection of Constituent Stocks –

- Companies should form part of NIFTY 500 at the time of review.
 - Minimum number of stocks within the index should be 10. In case, the number of eligible stocks representing the sector within NIFTY 500 falls below 10, then deficit number of stocks shall be selected from the universe of stocks ranked within top 800 based on both average daily turnover and average daily full market capitalisation based on previous six months period data used for index rebalancing of NIFTY 500, provided company meets the eligibility criteria of having minimum listing history of 1 calendar month and 90% trading frequency as the data cut-off date.
 - Further, in case the number of eligible stocks in the universe is still less than 10, then the deficit number of stocks shall be selected from the universe of stocks ranked within top 1000, top 1100, top 1200 and so on, based on both average daily turnover and average daily full market capitalization based on previous six months period data, until at least 10 eligible stocks are obtained, subject to fulfilment of other inclusion criteria. If the number of eligible stocks is still less than 10, then the index may have less than 10 constituents.
 - Companies should form a part of the Automobile sector.
 - Non – F&O stocks are eligible for inclusion only if the total instances of the stock hitting the upper or lower circuit (price band) during the past 6 months as of the cut-off date is less than 20% of the number of total trading days over the same period. An instance is counted each time the stock hits the upper or lower price circuit on a given trading day. If a stock hits the upper and lower price circuit (price band) on the same trading day, it will be counted as two instances.
 - The companies are sorted in the descending order of the average free-float market capitalization (FF market capitalization) and final selection of companies shall be made based on the FF market capitalization to form part of the index.
 - Companies will be included if free-float market capitalisation is at least 1.5 times the freefloat market capitalization of the smallest index constituent in respective index.
 - In case of reconstitution, latest index composition including most recent changes in respective parent index whether announced or yet to be announced shall be considered.
- Weightage of each stock in the index is calculated based on its free-float market capitalization such that no single stock shall be more than 33% and weightage of top 3 stocks cumulatively shall not be more than 62% at the time of rebalancing

Index Rebalancing:

The index is rebalanced semi-annually basis. The cut-off date is January 31 and July 31 of each year, i.e. For semi-annual review of indices, average data for six months ending the cut-off date is considered.
